DETAILED ACTION

Page 2

Election/Restrictions

1. Applicant's election with traverse of the Group I invention in the reply filed on 25 October 2004 is acknowledged. The traversal is on the ground(s) that new claim 11 is generic and that the search is not an undue burden on the Office. This is not found persuasive because new claim 11 is not patentable and clearly the searching of additional material is burdensome. Further, the structure making up the two embodiments is different.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 6-10 and 13 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 25 October 2004.

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claimed structure is the same as that of claim 11, e.g. "a wrench body" in claim 11 and another in claim 12, thus the same elements are twice claimed

Application/Control Number: 10/616,285

Art Unit: 3723

rendering the claim indefinite. It would also appear that claim 12 would be a duplicate of claim 1.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 6. Claims 1-3 and 11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by any of Smith or Chang as all the broadly claimed structure is present in all the references.

Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 1-5 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Layton et. al. in view of Chang.

Layton et. al. shows the claimed invention except for the use of a reversing mechanism to change direction of rotation. Chang suggests that a driver having ratcheting rollers can also be made reversible by use of a lever. It would therefore be obvious to one skilled in the art at the time the invention was made to modify

Application/Control Number: 10/616,285

Art Unit: 3723

Layton et. al. by using a reversing lever to change direction of rotation <u>because</u>

Chang suggests the use of such a mechanism in roller clutch types of wrenches.

- 9. Albertson is cited only as of interest at this time.
- 10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James G. Smith whose telephone number is 571-272-4496. The examiner can normally be reached on M-Th (7:05-4:35) Fri. off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph J. Hail, III can be reached on 571-272-4485. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
